GROWCIFY® / HIRING ASSESSMENT

UI/UX Designer Design Assignment

Full-Time · Remote | Industry: Property | Submission: Figma link | Estimated effort: 4–6 hours

Objective

Growcify helps businesses launch and manage branded mobile apps and websites. Design a modern, intuitive property discovery experience for a fictional real estate brand (residential sales and rentals). We will assess your visual craft, UX decisions, Figma skills, and consistency across mobile and web.

01 Mobile App Design

Create four mobile screens for iOS or Android:

- **Browse Listings:** brand header, search with location, filters (budget, BHK, buy/rent), map/list toggle, listing cards with price, area and location, bottom navigation.
- **Listing Details:** photo gallery, price, configuration, carpet area, amenities, location map, builder/owner info, save and share actions.
- **Schedule a Visit / Enquiry:** date and time slot selection, visit type (in-person or video), contact details, enquiry message, confirm action.
- **Saved:** saved properties, price-change indicators, compare action, scheduled visits, empty state.

02 Responsive Website Design

Design the desktop and mobile homepage of the same brand. Include intuitive navigation, property discovery, featured projects, locality highlights, listings, and clear enquiry actions. Maintain visual consistency with the mobile app.

03 Small Design System

Include a reusable Figma design system with colors, typography, buttons (primary, secondary, disabled), inputs, listing cards, and spacing / corner-radius conventions. Demonstrate Auto Layout and component reuse.

Submission Checklist

- Viewable Figma file with all four app screens and both homepage sizes
- Reusable components and design styles
- Short rationale (up to 200 words) explaining core UX and design decisions
- Optional bonus: clickable Browse Listings → Listing Details → Schedule a Visit prototype

Evaluation Criteria

Visual design and aesthetics	25%
User experience and usability	25%
Figma proficiency and components	20%
Mobile/web consistency	15%

Creativity and attention to detail	15%

Guidelines & Deadline

Choose any fictional property brand. Royalty-free assets are permitted. Designs must be original, editable, and usable; do not submit copied templates. You may use AI for inspiration, but must be able to explain and edit your Figma work.

Submit within 3 days of receiving this assignment. Share your Figma link, resume, and portfolio. Work is for evaluation only and will not be used commercially without a separate agreement.
